| Hersteller                               | Micro Commercial Components (MCC)                |
| Beschreibung                             | IC MCU 32BIT 128KB FLASH 48TQFP                  |
| Kategorie                                | Integrierte Schaltungen (ICs) > Eingebettet -    |
| Teilstatus                               | 2530 pcs Stock                                   |
| Spannung - Versorgung (Vcc / Vdd)        | FLASH                                            |
| Serie                                    | SAM D21G                                         |
| Rückwärts-Erholzeit (Trr)                | 48MHz                                            |
| Benötigt                                 | Brown-out Detect/Reset, DMA, I²S, POR, PWM, WDT  |
| Programmspeichertyp                      | 128KB (128K x 8)                                 |
| Programmspeichergröße                    | I²C, LIN, SPI, UART/USART, USB                   |
| Andere Namen                             | 1611-ATSAMD21G17A-AUTDKR                         |
| Oszillatortyp                            | A/D 14x12b, D/A 1x10b                            |
| Betriebstemperatur                       | -40°C ~ 85°C (TA)                                |
| Betriebssystem                           | ARM® Cortex®-M0+                                 |
| Feuchtigkeitsempfindlichkeitsstufe (MSL) | 3 (168 Hours)                                    |
| Hersteller Standard Vorlaufzeit          | 13 Weeks                                         |
| Hersteller-Teilenummer                   | ATSAMD21G17A-AUT                                 |
