The image shows a Zilog ZNEO32 128K Evaluation Kit. It consists of a green printed circuit board (PCB) populated with various electronic components, including a central integrated circuit (the Z8000 microprocessor), resistors, capacitors, and a 128Kbit EPROM. A white USB-to-serial adapter cable is connected to the board, with its USB end plugged into a port on the right side of the PCB. The board has a long edge connector on the left side, likely for interfacing with a host system.
